EDUCATION

Orange High School, Durham, NC — **Graduated**
High School Diploma — June, 2021

The University of North Carolina at Greensboro — **Expected Graduation**
B.S Computer Science — December, 2025

WORK EXPERIENCE

Apple — **02 2023 - Present**
At Home Advisor, Greensboro, North Carolina

- Indefatigably patient and persistent worker with expert levels in communication.
- Number 1 for the OMG org week of 11/6/24 even compared to those with higher positions.
- Consistently a fast problem solver, quick yet thorough contacts with customers.
- Efficient learner and quick integrator of new training.
- Very willing to grow and work with constructive criticism and company needs.

Bull City Art & Frame Company — **05 2016 - 08 2020**
Gallery Coordinator, Durham, North Carolina

- Achieved sales and delivered outstanding customer experiences through promoting an inviting and welcoming atmosphere.
- Learned professional flexibility by assisting other team members with their tasks to meet deadlines on a consistent basis.

PROJECT EXPERIENCE

Tutelage (Java, SQL, HTML, FTLH)
Software Development CSC 330, Group Project

- Utilized Java, FTLH, and SQL to create a website where student tutors can create listings for 1-on-1 sessions to teach their desired courses to other students who need assistance with them.
- Worked mainly on the provider side with solidifying the use cases of creating a profile, creating postings, messaging students, editing posts/profile, signing in/out, and deletion.
- Evolved static HTML pages for presentation to functioning FTLH files that would sub sequentially interact with the controller, services, and ultimately repositories for a seamless experience.

Fruit Identifying Machine Model (Python)
Machine Learning CSC 410, Class Project

- Utilized the coding environment Spyder, within Anaconda to program a few Machine Learning models to differentiate between three different fruits by ascertaining features relevant to them.
- Converted images from a banana, apple, and green grapes into feature vectors in the form of CSV files, and labeled appropriately with 64 features and their result indicator of 1-3.
- Utilized Random Forest and Lasso Regression to compare rates of correct fruit detection. After implementing dimensionality reduction via PCA the Machine learning model was 78% accurate with 3 classes.

SKILLS

Technical: C | Assembly | C++ | Java | HTML | FTLH | SQL | Python | PHP
Tools: Slack | Webex | Github | Herd | PHP | AMPPS | Postman | Powerpoint | Word | DBeaver
